 - Vulnerability And Network Intrusion Detection
 - Behavioral Monitoring
 - Security Intelligence

SECURITY OPERATIONS CENTER (SOC)

The Dataprise SOC combines tool-based intelligence from our Unified Security Management (USM) platform with human intelligence from our GIAC Certified Intrusion Analysts (GCIA) and operates 24x7x365, to protect your environment around the clock.

DETECTION AND ALERTING

Real-time intrusion detection and alerting is provided by certified security analysts in our dedicated 24x7 Security Operations Center (SOC). We provide security-focused monitoring and alerting for managed devices (e.g., desktops, laptops, servers, firewalls, switches), and constantly, work to determine potential threats to your organization so your business remains protected against the latest attacks.

ANALYSIS AND RESPONSE

Because threats never sleep, our security analysts provide global threat intelligence and world-class security expertise when analyzing alerts and conducting targeted correlation, both on a global and regional level. By leveraging Dataprise, our Intelligence Network, and our customer base, we help avoid false positives and focus on real threats to your environment. Dataprise has been externally appraised and certified by SSAE 16 for our internal processes and procedures.

EVENT CORRELATION AND TRENDING

We believe transparency is key for your business to remain secure. To give you a comprehensive picture of the alerts happening in your environment, you receive event correlation and trending analysis of alerts from a dedicated security program manager, as well as post-incident analysis and monthly vulnerability scanning.

THE BENEFITS?

- ✓ Real-time, always-on monitoring and intelligence-based threat detection
- ✓ Single unified security platform visibility across the network
- ✓ Holistic response to attacks
- ✓ Remotely managed, geographically dispersed sites
- ✓ Regulatory requirements are addressed and reported on
- ✓ Flexible and scalable solution to fit the business risk profile
- ✓ Advanced reporting capabilities
- ✓ Address the security industry skills gap by staffing broad expertise
- ✓ Monitoring is provided 24x7x365
